# ONE PATIENT. ONE FAMILY. ONE WORLD.

---

Expanding our Impact  
to the Dominican Republic

---

**ONE WORLD SURGERY  
CAPITAL CAMPAIGN**

# A Unique Vision for Hope, Healing, Opportunity

A decade ago, Peter & LuLu Daly, our founders, saw a profound need for best-in-class surgical care in a region of deep poverty.

An orthopedic surgeon and nurse, they knew that scarce medical resources and lack of access perpetuate a cycle of poor health, poverty and homelessness.

The Dalys were inspired to serve and to ignite the spirit of service in others – building a stand-alone surgery center in Honduras.

# One World Surgery – A Decade of Impact

Our surgery center is located on the 2,000 acre ranch of the children's home, Nuestros Pequeños Hermanos (NPH).

We provide surgeries across seven different specialties – orthopedics; general surgery; ear, nose and throat; gynecology; spine; ophthalmology; and urology.

**31,000**

patient consultations

**5,000**

surgeries

**thousands**

of volunteer visits

ONE WORLD SURGERY CAPITAL CAMPAIGN

Service. Healing. Transformation.

Our distinctive approach with in-country, on-the-ground capabilities is a model for developing countries.

Our research confirms cost-effective, high-quality outcomes with strong patient satisfaction – comparable to results in high-income countries.

# Partnerships to Provide Life-Changing Outcomes

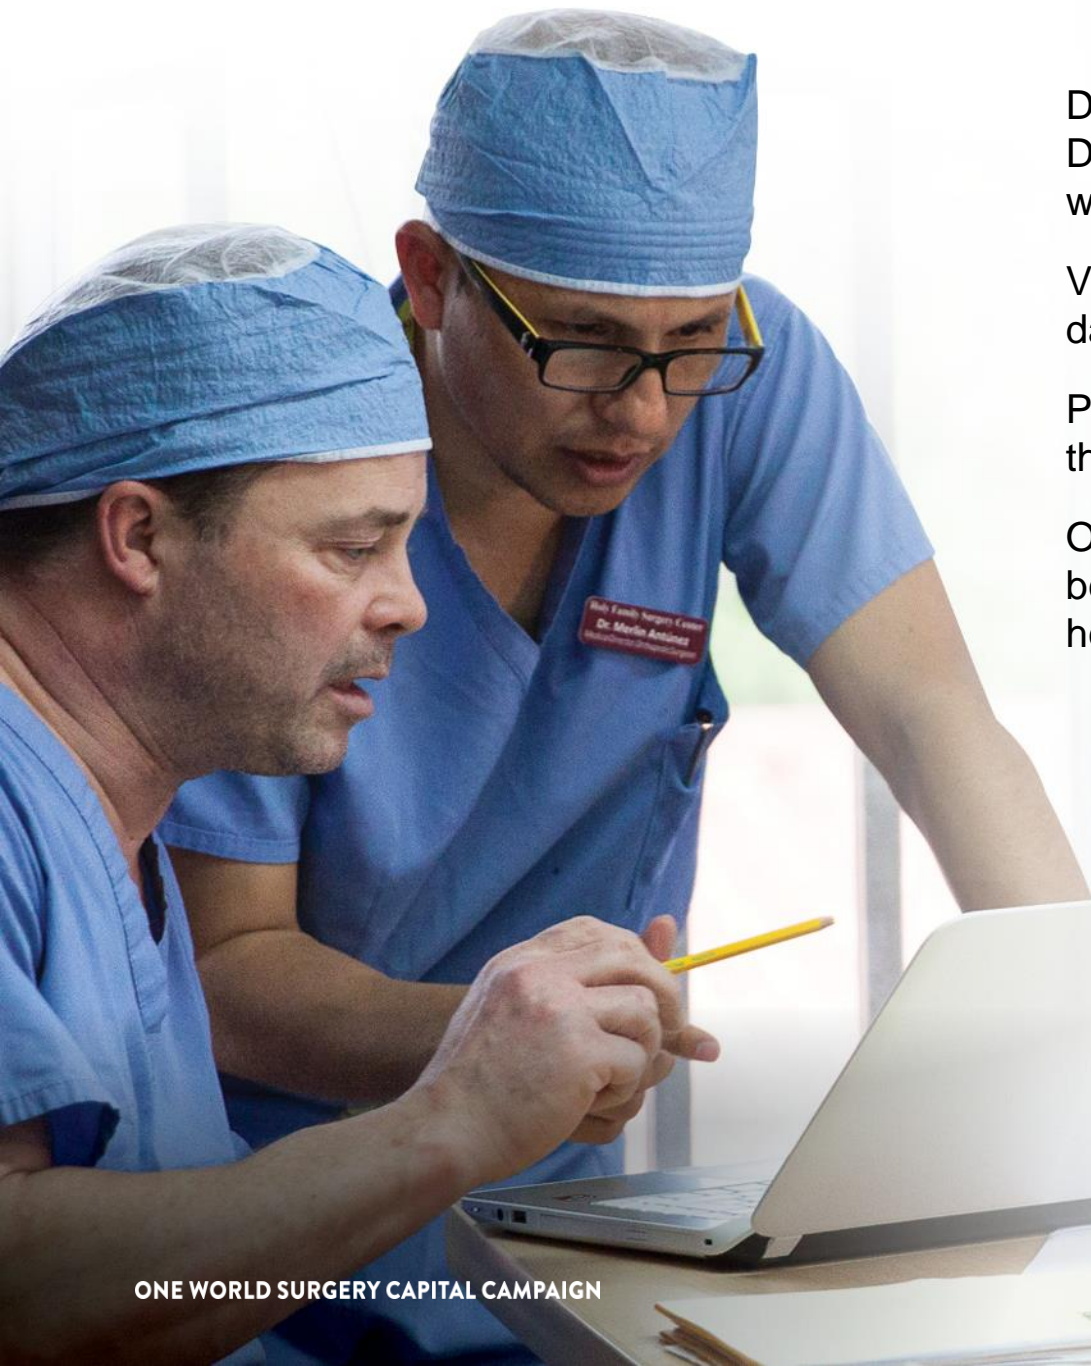

Our strength comes from  
our long-term collaboration  
and commitment to our  
Honduran community.

ONE WORLD SURGERY CAPITAL CAMPAIGN

Service. Healing. Transformation.

Dr. Merlin Antunez, our Honduran Medical Director, and 5 of our 15 Honduran staff were raised at NPH.

Volunteer medical missions enhance the daily operations of our Honduran staff.

Patients are offered the continuity of care that is essential to successful outcomes.

Our volunteers and Honduran team benefit from the exchange of knowledge, help, and friendships.

# Volunteers Ignited by the Spirit of Service

The opportunity for medical professionals to volunteer with their families and to experience the loving, supportive environment of NPH is unique.

The medical mission experience awakens a deep understanding of those in need, igniting a continuing passion to serve, abroad and in their local communities.

# Preparing the Next Generation

A fundamental belief: education is the most powerful tool to change the world.

For those dreaming of becoming nurses, social workers, doctors, we are showing what is possible.

Through our education and training programs, we are investing in the future of health care in Honduras.

# Our Unwavering Commitment to Honduras

One World Surgery is strong and growing, performing 1,100 transformative surgeries per year.

Medical missions have expanded from a handful each year to more than 20 – and we have a waiting list of surgeons eager to volunteer.

We are expanding training, education, and employment to build Honduran capacity.

We are extending our services to primary care to better serve our patients.

# OUR SUCCESS IN HONDURAS COMPELS US TO DO MORE

---

“I see the DR as a natural extension, because our Mission doesn’t just work in Honduras. It’s global work.”

— Maria Doria, Medical Missions Manager

# Making More Possible – Our Opportunity in the Dominican Republic

Our success in Honduras demonstrates that we play a vital role in addressing global health inequities in under-resourced communities.

We are making a deliberate and prudent strategic decision to expand to the Dominican Republic – a country with pressing need among Dominicans and Haitian immigrants.

Our experience and success in Honduras equip us for the Dominican Republic:

- We will again partner with a local NPH home in a country with political stability and support from government officials.
- We will build a permanent center, with full-time local staff.
- We will provide an array of education and training opportunities.

Easy access to and from the United States will encourage volunteer missions.

# RESTORING HEALTH, RESTORING HOPE

---

“It’s little things like a broken leg that can completely sidetrack you. If you can’t walk, you can’t work, you can’t support your family, you can’t be part of the community, or the world. If you fix a patient’s leg, you help a family, community, the world.”

— Co-founder LuLu Daly

# A Vital Resource: Our Plan for the Dominican Republic

The new 25,000-sq. ft. surgery center and visitor center will provide:

- Free, world-class clinical, surgical and follow-up care— with up to 10,000 consultations and 1,200 surgeries a year.
- A primary care clinic delivering essential preventative care to avoid costly illnesses or diseases, and pre- and post-operative care to our surgery center.
- A dormitory, training and conference room; a chapel for visitors and patients.
- We will extend our commitment to the community, offering healthcare, employment opportunities, education and vocational training.

# Building a Solid Foundation

Based upon our decade of experience in Honduras, we are prepared for the Dominican Republic with staff, infrastructure and know-how.

Our NPH partners will provide local contacts and credibility.

Staffing plans are on track for a timely, efficient ramp up:

- Executive Director Claire Cunningham will relocate with her family to the Dominican Republic in August 2019.
- Longtime volunteer, Dr. Hugh West, will serve as Chief Medical Officer.

Our partnership with Surgical Care Affiliates (SCA) and Optum will enable us to accelerate our impact.

# Stewards of Our Legacy and Our Future

We are gratified by the continuing support and enthusiasm of those central to our growth:

- **Peter and LuLu Daly:** Beginning as volunteers at NPH, Peter, who is now chief medical officer of OWS, and LuLu are the visionaries behind our permanent surgical center in Honduras.
- **Andrew and Nicole Hayek:** As the CEO of OptumHealth and OWS board chair, Andrew spearheaded the SCA Medical Missions, providing volunteer opportunities for doctors and teammates; Nicole, a longtime OWS volunteer, chairs the One Patient. One Family. One World campaign.
- **Reinhart Koehler:** As president of NPH International and an OWS board member, Reinhart's deep understanding and ties to the NPH community are crucial to OWS – and, he recommended the Dominican Republic as our next site.

Together, their confidence in our ability – our duty – to care for more will inspire others to join us.

**JOIN US AS WE CONTINUE THE  
JOURNEY THAT BEGAN A DECADE  
AGO—TO HEAL THE WORLD ONE  
PATIENT AT A TIME.**
