auction, cocktail hour, dinner, programming,
music, and dancing!

About One World Surgery

One World Surgery is a beacon of sustainable global healthcare, dedicated to providing world-class surgical and primary care to communities in Honduras and the Dominican Republic. OWS trains and empowers local medical professionals through partnerships and ongoing educational opportunities. Alongside our local medical teams, volunteers attend medical missions to our sites to further our impact.

Through our commitment to sustainability, education, and ongoing collaboration with our community partners, we work to build a legacy of hope and healing for our patients, their families, and the community as a whole—**all at no cost to the patient.**

Our corporate partner, SCA Health, has a long and vibrant history of working with One World Surgery to address the global health crisis through a sustainable and transformational continuum of care.

We invite you to partner with us through sponsoring the 2025 SCA Health Gala.

Our Why

- Globally, **five billion people** lack access to safe, timely, and affordable surgical care.
- It is estimated that **143 million** additional surgical procedures are needed annually to prevent death and disability. This indicates a significant gap between current surgical capacity and the actual need for surgical interventions globally.
- Failure to address the surgical disease burden can have severe economic consequences. Low and middle-income countries could lose up to **2% of their GDP by 2030** due to untreated surgical conditions. The global economic loss due to this is projected to be around **\$12.3 trillion**.
- Only **5% of the Honduran population** has access to surgical care when needed.
- In the Dominican Republic, the rate of potentially avoidable premature mortality stands at **380 deaths per 100,000 population**, indicating significant gaps in access to timely and effective healthcare services.

The Future

Advancing Access to High-Quality Care Globally

- Target marginalized, vulnerable patient populations who cannot afford or access care
- Specialties & services provided fill gaps based on communities' needs
- Dedicated facilities and in-country staff to ensure continuity of care & high-outcomes

Building Capacity to Empower Healthcare Professionals Globally

- Build community healthcare capacity through continuing education, training, and certification for in-country clinical staff, students and the healthcare community
- Fellowships and scholarships to improve and enhance healthcare delivery

Igniting the Spirit of Service

- Cross-sector collaboration is key to achieve our impact. For 20 years, we have fostered partnerships with governments, NGOs, companies and healthcare institutions to leverage collective expertise and resources.
- Working globally and in-countries—we co-create opportunities to accelerate impact through service
