Position: Communications Assistant at the Dominican Republic Surgical Center

Time Commitment: January 2027 to February 2027

Mission

Nuestros Pequeños Hermanos, inspired by Christian values, strives to create a loving and safe family environment for vulnerable children living in extreme conditions. Through comprehensive education, healthcare and spiritual formation, we give the children the opportunity to develop their potential, shaping better futures for themselves, their families and their communities.

Vision

A world without poverty where all children develop their unique potential, becoming productive members of society serving their community.

Overview

One World Surgery (www.oneworldsurgery.org) runs an ambulatory surgery center and primary care field clinics and is located on the grounds of NPH Dominican Republic. The surgery center has a full-time Dominican staff that performs surgery and provides primary care year-round. Teams of approximately 30+ people from the US routinely visit the surgery center for week-long volunteer medical missions. During medical missions, clinical and nonclinical participants come together to perform life-changing surgeries and run internal and external primary care clinics for Dominicans who would otherwise go without treatment. Nonclinical volunteers also support non-medical community projects focused on health and wellness.

The Communications Assistant is a creative, organized, and mission-driven volunteer who will play a crucial role in advancing One World Surgery's storytelling and digital presence. This volunteer will be based on-site in the Dominican Republic and will work closely with both the U.S. Communications team and local medical/operations staff to gather, create, and edit content—especially patient stories, interviews, photography, and video—to support OWS's social media, marketing, and donor stewardship efforts. This role is ideal for someone interested in nonprofit communications, ethical global health storytelling, digital media, and international development. The volunteer will also provide light support during medical missions to help capture meaningful content and ensure accurate, responsible representation of OWS's work.

The typical work hours are from 7:00 am – 4:15 pm Monday-Friday but early morning and evening hours, and occasional weekends will be required on surgical days and during medical missions. The Coordinator should expect to work 40 hours/week and possibly more during medical missions.
